## **FORWARD-LOOKING STATEMENTS**

Certain statements in this website or in the Content may constitute “forward-looking” statements within the meaning of applicable securities laws. These forward-looking statements can generally be identified by words such as “believes”, “anticipates”, “expects”, “plans”, “estimates” or words of similar nature.

The forward-looking statements are based on current expectations and are subject to known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Pure Energy to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others: the general economic and business conditions in Canada and the United States; demand for oilfield services during drilling and completion of oil and natural gas wells; volatility in market prices for oil and natural gas and the effect of this volatility on the demand for oilfield services generally; competition; liabilities and risks, including environmental liabilities and risks, inherent in oil and natural gas operations; sourcing, pricing and availability of raw materials, consumables, component parts, equipment, suppliers, facilities, and skilled management, technical and field personnel; the ability to integrate technological advances and match advances of competition; the availability of capital; uncertainties in weather and temperature affecting the duration of the oilfield service periods and the activities that can be completed; dependence on major customers; changes in legislation and the regulatory environment, including uncertainties with respect to implementing the Kyoto Protocol; currency exchange risks; and other circumstances affecting revenues and expenses. The impact of any one factor on a particular forward-looking statement is not determinable with certainty as such factors are dependent on other factors, and management’s course of action would depend upon its assessment of the future considering all information then available.

The foregoing list of factors is not exhaustive. Although Pure Energy believes that the expectations conveyed by the forward-looking statements are reasonable based on information available to it on the date such forward-looking statements are made, no assurances can be given as to future results, levels of activity and achievements. All forward-looking statements, whether written or oral, attributable to Pure Energy or persons acting on its behalf are expressly qualified by these cautionary statements. Pure Energy assumes no obligation to update forward-looking statements should circumstances or management’s estimates or opinions change.

## **SPECIAL NOTE REGARDING NON-GAAP FINANCIAL MEASURES**

Management’s discussion and analysts includes references to financial measures commonly used in the oilfield services industry, such as “EBITDA” (earnings before interest, taxes, depreciation and amortization). These financial measures are not defined by generally accepted accounting principles (GAAP) and accordingly are referred to as non-GAAP measures. The non-GAAP measures used by Pure Energy may not be comparable to similar measures presented by other companies. Pure Energy uses these non-GAAP measures to evaluate its performance and its business segments. The non-GAAP measures should not be considered as an alternative to net earnings or other measures of financial performance calculated in accordance with GAAP.
